Attention: Mr. A. Lynn Libby
High Voltage & Mechanical Laboratory

Subject: High Voltage Terminations

Dear Mr. Libby:

Our field representative, Mr. John Carlson of the Jay Company, has transmitted your inquiry for 25 cm. diameter spheres and we would propose the following.

Our standard part TS-350 is 10" diameter, manufactured of spun aluminum with a high polish finish. The price is \$33.75 each in quantities up to 9 pieces.

For precision measurement and sphere gap work, we do offer an alternate choice meeting world standards for tolerance, material and mirror finish. An aluminum sphere is priced at \$250 each while the brass, high polish version, is \$450 each. The availability of these items is 6 weeks after receipt of an order.

We trust you will find the above to be in accordance with your request and should you require additional information, please do not hesitate to contact the writer here at the factory or John Carlson, our field representative, at Falls Church, Virginia phone number 534-7800.

Yours very truly,

UNIVERSAL VOLTRONICS CORPORATION

STANDARD CONDITIONS OF SALE

Sale of any of the equipment or services described or referred to in this quotation at the quoted prices is expressly conditioned upon the terms and conditions set forth below. Any order for or any statement of intent to purchase any such equipment or services, or any direction to proceed with engineering, procurement, manufacture or shipment, shall constitute assent to said terms and conditions and a representation that the Purchaser is solvent. Any additional or different terms or conditions set forth in any such communication from the Purchaser are hereby objected to by General Electric Company and shall not be effective or binding unless assented to in writing by an authorized representative of the Company.

WARRANTY

The Company warrants to the Purchaser that the equipment to be delivered hereunder will be free from defects in material or workmanship and will be of the kind and quality designated or specified in the contract.

This warranty shall apply only to defects appearing within one year from the date of shipment by the Company. If the Company installs the equipment or supplies technical direction of installation by contract, the warranty period shall run from the completion of installation, provided same is not unreasonably delayed by the Purchaser. The conditions of any tests shall be mutually agreed upon and the Company shall be notified of, and may be represented at, all tests that may be made.

If the equipment delivered hereunder does not meet the above warranty, and if the Purchaser promptly notifies the Company, the Company shall thereupon correct any defect, including non-conformance with the specifications, either (at its option) by repairing any defective or damaged parts of the equipment, or by making available at the Company's plant necessary repaired or replacement parts. The liability of the Company under this warranty (except as to title), or for any loss or damage to the equipment whether the claim is based on contract or negligence, shall not in any case exceed the cost of correcting defects in the equipment as herein provided and upon the expiration of the warranty period all such liability shall terminate. The foregoing shall constitute the exclusive remedy of the Purchaser and the exclusive liability of the Company.

The foregoing warranty is exclusive and in lieu of all other warranties, whether written, oral, implied or statutory (except as to title). **NO WARRANTY OF MERCHANTABILITY OR OF FITNESS FOR PURPOSE SHALL APPLY.** The Company does not warrant any equipment of other manufacture designated by Purchaser.

PATENTS

The Company shall defend any suit or proceeding brought against the Purchaser so far as based on a claim that any equipment, or any part thereof, furnished under this contract constitutes an infringement of any patent of the United States, if notified promptly in writing and given authority, information and assistance (at the Company's expense) for the defense of same, and the Company shall pay all damages and costs awarded therein against the Purchaser. In case said equipment, or any part thereof, is in such suit held to constitute infringement and the use of said equipment or parts is enjoined, the Company shall, at its own expense and at its option, either procure for the Purchaser the right to continue using said equipment or part; or replace same with non-infringing equipment; or modify it so it becomes non-infringing; or remove said equipment and refund the purchase price and the transportation and installation costs thereof. The foregoing states the entire liability of the Company for patent infringement by said equipment or any part thereof.

The preceding paragraph shall not apply to any equipment, or any part thereof, manufactured to Purchaser's design. As to such equipment or part, the Company assumes no liability whatsoever for patent infringement.

DELIVERY

Shipping dates are approximate and are based upon prompt receipt of all necessary information.

The Company shall not be liable for delays in delivery or in performance or failure to manufacture or deliver, due to (1) causes beyond its reasonable control, or (2) acts of God, acts of the Purchaser, acts of civil or military authority, priorities, fires, strikes or other labor disturbances, floods, epidemics, war, riot, delays in transportation or car shortages, or (3) inability on account of causes beyond its reasonable control to obtain necessary labor, materials, components or manufacturing facilities. In the event of any such delay, the date of delivery or of performance shall be extended for a period equal to the time lost by reason of the delay.

PAYMENTS

Pro rata payments shall become due as shipments are made. If shipments are delayed by the Purchaser, payments shall become due on the date when the Company is prepared to make shipment. If the work to be performed hereunder is delayed by the Purchaser, payments shall be made based on the purchase

price and the percentage of completion. Equipment held for the Purchaser shall be at the risk and expense of the Purchaser.

If the financial condition of the Purchaser at any time does not, in the judgment of the Company, justify continuance of the work to be performed by the Company hereunder on the terms of payment agreed upon, the Company may require full or partial payment in advance or shall be entitled to cancel any order then outstanding and shall receive reimbursement for its reasonable and proper cancellation charges. In the event of bankruptcy or insolvency of the Purchaser or in the event any proceeding is brought against the Purchaser, voluntarily or involuntarily, under the bankruptcy or any insolvency laws, the Company shall be entitled to cancel any order then outstanding at any time during the period allowed for filing claims against the estate and shall receive reimbursement for its reasonable and proper cancellation charges. The rights of the Company under this paragraph are cumulative and in addition to all rights available to the Company at law or in equity.

SALES AND SIMILAR TAXES

The Company's prices do not include sales, use, excise or similar taxes. Consequently, in addition to the price specified herein, the amount of any present or future sales, use, excise, or other similar tax applicable to the sale or use of the equipment hereunder shall be paid by the Purchaser, or in lieu thereof the Purchaser shall provide the Company with a tax-exemption certificate acceptable to the taxing authorities.

CANCELLATION

The Purchaser may cancel his order only upon written notice and upon payment to the Company of reasonable and proper cancellation charges.

LIMITATION OF LIABILITY

The Company's liability on any claim of any kind, including negligence, for any loss or damage arising out of, connected with, or resulting from this contract, or from the performance or breach thereof, or from the design, manufacture, sale, delivery, resale, installation, technical direction of installation, inspection, repair, operation or use of any equipment covered by or furnished under this contract shall in no case, (except as provided in the paragraph entitled "Patents"), exceed the price allocable to the equipment or unit thereof which gives rise to the claim and shall terminate four years after the completion of installation of the equipment.

In no event, whether as a result of breach of contract or warranty or alleged negligence, shall the Company be liable for special or consequential damages including, but not limited to, loss of profits or revenue, loss of use of the equipment or any associated equipment, cost of capital, cost of substitute equipment, facilities or services, downtime costs, or claims of customers of the Purchaser for such damages.

GENERAL

The Company represents that any goods to be delivered hereunder will be produced in compliance with the requirements of the Fair Labor Standards Act of 1938, as amended.

An extra charge will be made for special containers, but refund will be made if returned in good condition to the factory or other point designated by the Company within 90 days from date of original shipment, charges prepaid (reels within 12 months, f.o.b. cars, charges collect).

Any assignment of this contract, or any rights hereunder, by the Purchaser without written consent of the Company shall be void.

The provisions of this contract are for the benefit of the parties thereto and not for any other person.

No understanding, promise or representation, and no waiver, alteration or modification of any of the provisions hereof, shall be binding upon the Company unless assented to in writing by an authorized representative of the Company.

The equipment sold hereunder was not designed or manufactured for use in or with any atomic installation or activity. If so used the Company disclaims all responsibility of every kind, including negligence, and in addition the Purchaser shall indemnify and hold the Company harmless for any liability or damage whatsoever arising out of the use of the equipment in such a manner.

Quotations on items containing a substantial portion of copper are subject to change without notice. A firm price commitment will be made at the time an order is placed.

This quotation is void unless accepted within thirty days from date hereof and in the meantime is subject to change as noted above. It supersedes all previous quotations and agreements.

Unless otherwise noted TERMS ARE NET 30 DAYS.

Shipping dates are approximate and are based on prompt receipt of all necessary information. In case of delay in furnishing complete information, dates of shipment may be extended to cover such delay. Receipt of the material by the Purchaser shall constitute a waiver of all claims for delay.

Permal, Inc., shall not be liable for loss, damage, detention or delay resulting from causes beyond its reasonable control or caused by fire, strike, civil or military authority, insurrection or riot, embargoes, car shortages, wrecks or delays in transportation.

Gentlemen:

Universal Electronics offers spheres for high voltage applications and perhaps offer one sphere type of interest to us.

Part No. TS-350 is a sphere of 10 inch diameter. This is close to, but slightly less than, a sphere of 25 centimeters in diameter. Can Universal quote us two spheres of exactly 25 centimeters diameter?

Very truly yours,

A. Lynn Libby
High Voltage & Mechanical Laboratory
